

Team Name: sdmay24-04

Team Members: Mike Gradle, Ricky Smith, Gabe Owen, Kristen Hawken, Jonah Besselievre, Rose Druce-Hoffman

Report Period: Sept 25-Oct 8

Summary of Progress in this Period

During this week, we worked more on the design screens in Figma. We have added on to the previous ones we made with more detail. Also, we met with our client again to discuss more about UI and what they prefer. Learned more about React and are coming close to deciding what database we want to use. Client mentioned some data loggers that other organizations use and we are investigating more into them. We also completed our design document and are migrating some of the information over to our lightning talk.

Pending Issues

We need to talk with ETG to get a server setup to host our website as we create it. By next week, we should have the backend fully figured out. Overall, we have had very few issues and are on track.

Plans for Upcoming Reporting Period

Create more screens and verify that they are what the client expects. We want to have picked our database of choice for the next report. If needed, we will complete more documents that are assigned.
